

Sample Web-based Tutorials and Demos

Tutorials and demos are online simulations – often viewed via the Internet. For sales and marketing, your target audience and watch an online demos and see first-hand exactly what your product can do. By adding interactive features such as quizzes, click boxes, and text entry fields, you can build tutorials to test your users. Softek utilizes RoboDemo to create highly compressed, native Flash files. Users will not have to wait long periods of time to download the demo or tutorial.

Sample Tutorial Screen

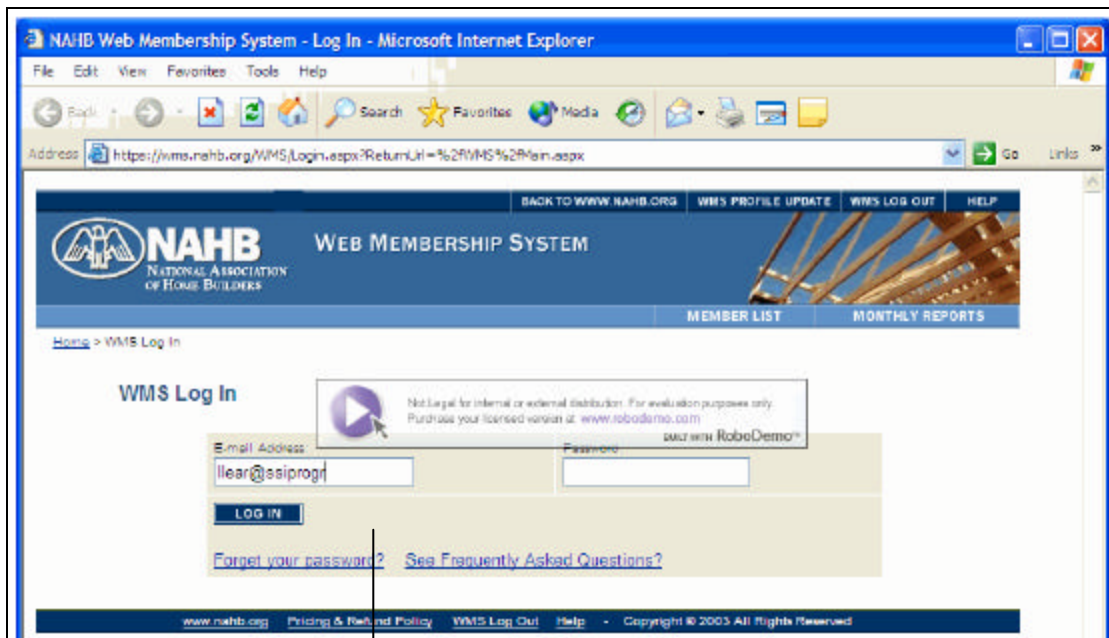

The following sample screens illustrate the first three steps on a Web-based tutorial. The tutorial walks users through logging in to the system. Using callouts and audio, the tutorial explains each step of the login process.

First Screen of a Log-In Tutorial

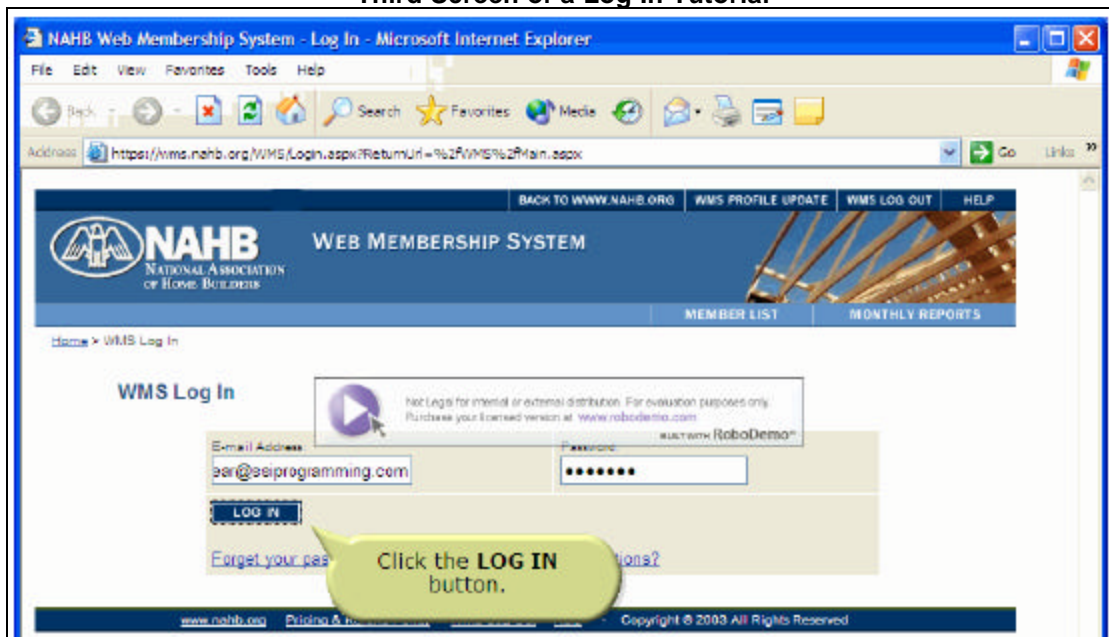

The callout explains the next step of the login process.

Second Screen of a Log-In Tutorial

As the user watches, the tutorial demonstrates how to enter the E-mail Address and Password.

Third Screen of a Log-In Tutorial
